Charging Cradle capacity: 1000 mAh

Supports CVC6.0 active noise cancellation

Supports A2DP1.3/HFP1.2/AVRCP1.6/DI1.3

Please wear the wireless earphones like this.

STONED

**CRYSTAL CLEAR AUDIO
WITHOUT ANY WIRES**

Pairing the Stoned Earphones to a phone

1. Turn the earphones off.
2. Hold the button down on one earphone until you hear a “pairing” chime.
3. Hold the button down on the other earphone until you hear a “power on” chime.
4. Open your Bluetooth settings and pair with the Stoned Earbuds.
5. Enjoy the music!

(The earbuds may also be paired with a laptop or any other Bluetooth-capable host.)

Linking the Stoned Earphones to each other

1. Turn the earphones off.
2. Simultaneously press and hold the button on both earphones for 8 to 10 seconds.
3. The LEDs on the earphones will begin to flash red and blue.
4. When the earphones have paired with each other, the LEDs on both earphones will flash blue once.
5. Release the buttons on each earphone.

The linking relationship is saved for future use; you should only need to do this once. Any two Stoned Earphones may be linked to each other; if you have more than one pair of Stoned Earphones, you may freely mix them.

Powering off the Stoned Earphones

1. Press the button on one earphone for 3 seconds until you hear a “power off” chime.

The Button

Pause: tap the center button once.

Next song: tap the center button twice.

Answer call: tap the center button once.

End call: tap the center button once.

Reject call: tap the center button twice.

Charging

Put the earphones in the charging case. While charging, you’ll see a red LED. When charging has finished, you’ll see a blue LED.

The charging case may itself be charged by plugging it into a USB power source.

Don't do this

1. Don't throw Stoned Earphones in the trash. The Stoned Earphones contain lithium-ion polymer batteries, and must be disposed of at an appropriate facility.
2. Don't subject the Stoned Earphones to excessive physical stress.
3. Don't submerge the Stoned Earphones in water—the Stoned Earphones are not waterproof.
